

Environmental Policy

Crown Gas & Power's ongoing mission is to deliver personable, dependable, and sustainable energy supply services that meet and exceed the expectations of our customers and wider stakeholders. As part of this mission we are committed to ensuring our office based operations take account of our business needs, our peoples needs and also our planets needs.

To support this commitment Crown Gas & Power, led by the Board of Directors, has implemented an Environmental Management System (EMS) that meets the requirements of ISO14001:2015.

Our EMS is designed to:

- Identify, monitor, and manage the environmental impacts and compliance obligations associated with our activities.
- Measure and report our environmental performance seeking practical opportunities to reduce our environmental impact and emissions.
- Control office purchasing, asset management, and disposal to minimise waste and maximise value.
- Prepare for, and respond effectively to environmental incidents to prevent or reduce harm
- Communicate openly with stakeholders on our environmental performance and progress.
- Engage constructively with industry and regulatory bodies to support wider Net Zero and climate change goals.
- Continually improve our environmental performance and the effectiveness of our EMS.

This Environmental Policy is reviewed regularly to ensure its ongoing appropriateness and effectiveness.
