Environmental Policy

Crown Gas & Power is committed to tackling the environmental impacts of its internal operations, whilst supporting others to do the same, by actively focusing our efforts around the following strategic pillars:

To support this commitment Crown Gas & Power, led by the Board of Directors, shall:

- framework for identifying and reducing the environmental aspects and/or impacts of our services.
- Implement a framework for identifying and monitoring compliance with environmental obligations and requirements relevant to the nature of our operations.
- Measure, reduce, and offset operational emissions generated from our office-based activities in line with recognised carbon accounting methodologies.
- Work with our direct suppliers to understand the environmental impacts of the goods and services we purchase as a company.
- Promote conscious consideration of the environmental aspects and/or impacts of energy products consumed by our customers.
- Communicate transparently with interested stakeholders regarding the progress and success of our sustainability efforts.
- Continue to actively engage with Ofgem and the Secretary of State to protect the interests of existing and future consumers.

The appropriateness and effectiveness of this Environmental Policy is reviewed on an ongoing basis.
